

# STOP FARNBOROUGH AIRPORT EXPANSION

**STOP THE NOISE.**

**STOP POLLUTING FOR PROFIT.**

Farnborough is the 4<sup>th</sup> busiest private jet airport in Europe.

Other countries are clamping down on short flights and private jets because the pollution harms our health today and the planet we leave for our children tomorrow.

**SCAN FOR THE PETITION**

**AND STOP IT HERE TOO.**

# FARNBOROUGH AIRPORT EXPANSION REALITY

## MORE NOISE

Those living in the flight corridors have seen traffic increased from 10 a day to 20 an hour. These proposals want to double weekend flights and extend operating hours.

## MORE POLLUTION

Private jets emit up to 40 times more CO2 than commercial airlines, carrying an average of just 2.5 passengers per plane. Most flights are short hops to European holiday destinations. This expansion enables more of the super wealthy to pollute our planet for the sake of convenience.

## MORE PROFIT

Australian company Macquarie owns the airport. They profited from piling up debts in UK water companies, wrecking our rivers. Now they want to exploit our airspace at the expense of local residents and clean air. In their last audited year, they transferred £29m, nearly half their revenue, back to the corporate business.

## NO MORE JOBS

The airport claims it generates significant employment and economic benefit. In fact the airport's flight operations employ only 200 people and only 40 of them live in the borough. How many jobs will this expansion really provide?
